Experience

Northrop Grumman Cincinnati, OH
Cyber Software Engineer 2026 – Present
Associate Cyber Software Engineer May 2023 – 2026

- Led a team of two developers to migrate a 50+ repository, 25+ developer project to a secure network, ahead of the client's schedule.
- Rebuilt GitLab CI/CD pipelines and configured a GitLab Runner in the new environment, restoring full functionality across all migrated projects.
- Set up a new test environment and wrote most of the installation tests for a multi-team CI pilot, which the client graded an A.
- Delivered 16 tickets and 20 merge requests on time for a product's first release, writing and fixing tests along the way to reduce regression risk.
- Reviewed 62 merge requests in one quarter and introduced a merge request template adopted across all of the program's GitLab repositories.
- Deployed and maintained dozens of compute-heavy, production-like environments for release validation, managing usage to control costs.
- Led three developers to build single-file snapshot and restore for an emulator, eliminating hour-long startups and saving an estimated hundreds of hours.
- Built a GDB stub for a PowerPC emulator, giving developers remote debugging that is now part of their daily workflow.
- Led the migration of a web application from PHP to Django, improving its functionality and maintainability.

Projects

AI Moon Lander Website · Paper

- Built a web-based lunar lander game with AI integration for human-AI teamwork research, published in ACM CHI 2023 Extended Abstracts.

Model-Based IoT GitHub

- Built formal test models in UPPAAL (timed automata) for a web-based IoT deployment tool.

Publications

K. Momose, T. Weekes, R. Mehta, **C. Wright**, J. Moukpe, T. Eskridge. Patterns of Effective Human-Agent Teams. In *Extended Abstracts of the 2023 CHI Conference on Human Factors in Computing Systems*. ACM, 2023. doi:10.1145/3544549.3585608

Education

Florida Institute of Technology Melbourne, FL
B.S. Computer Science 2023

- Upsilon Pi Epsilon honor society (top 35% of computer science students)

Skills

Languages	Python, Bash, C, JavaScript, PHP, SQL
DevOps and Cloud	AWS, Terraform, Terragrunt, GitLab CI/CD, Docker, Linux
Tools and Frameworks	Django, Git, GDB, Robot Framework
